Step 6:

After login successful (Screen will display your default setting), the SP system windows will appear.

FAQ:

1) Change email address

If the customer want to change the e-mail address to receive the OTP and trade notification messages, should notify us in writing.

2) Change password

To increase account security, please change your password regularly. If you don't change your password after a certain period of time, the SP system will prompt you to change it. Open the Change Password window from Preference Menu

If it is the first time logging into the SP system, you should change your password in the Change Password Window. You must change your password before trading can be made.

Your password must have:

eight or more characters
at least one characters include upper or lowercase letters
at least one number
new password must not match the previous 5 times passwords

3) View and remove your associated devices

You can view a list of devices associated with your User ID and remove the devices that you no longer want associated.

Step:

From the menu bar at the SP system and click Device Security Management. After you click Device Security Management, you'll see information about all of your associated devices. On the Devices page, double click the selected device that you want to remove.
